The recommendations contained in Thermakraft's literature are based on good building practice, but are not an exhaustive statement of all relevant information and are subject to any conditions contained in the Warranty. All product dimensions and performance claims are subject to any variation caused by normal manufacturing process and tolerances. Furthermore, as the successful performance of the relevant system depends on numerous factors outside the control of Thermakraft (for example quality of workmanship and design), Thermakraft shall not be liable for the recommendations in that literature and the performance of the Product, including its suitability for any purpose or ability to satisfy the relevant provisions of the Building Code, regulations and standards. Literature subject to change without notification. Latest documentation can be found on the website.

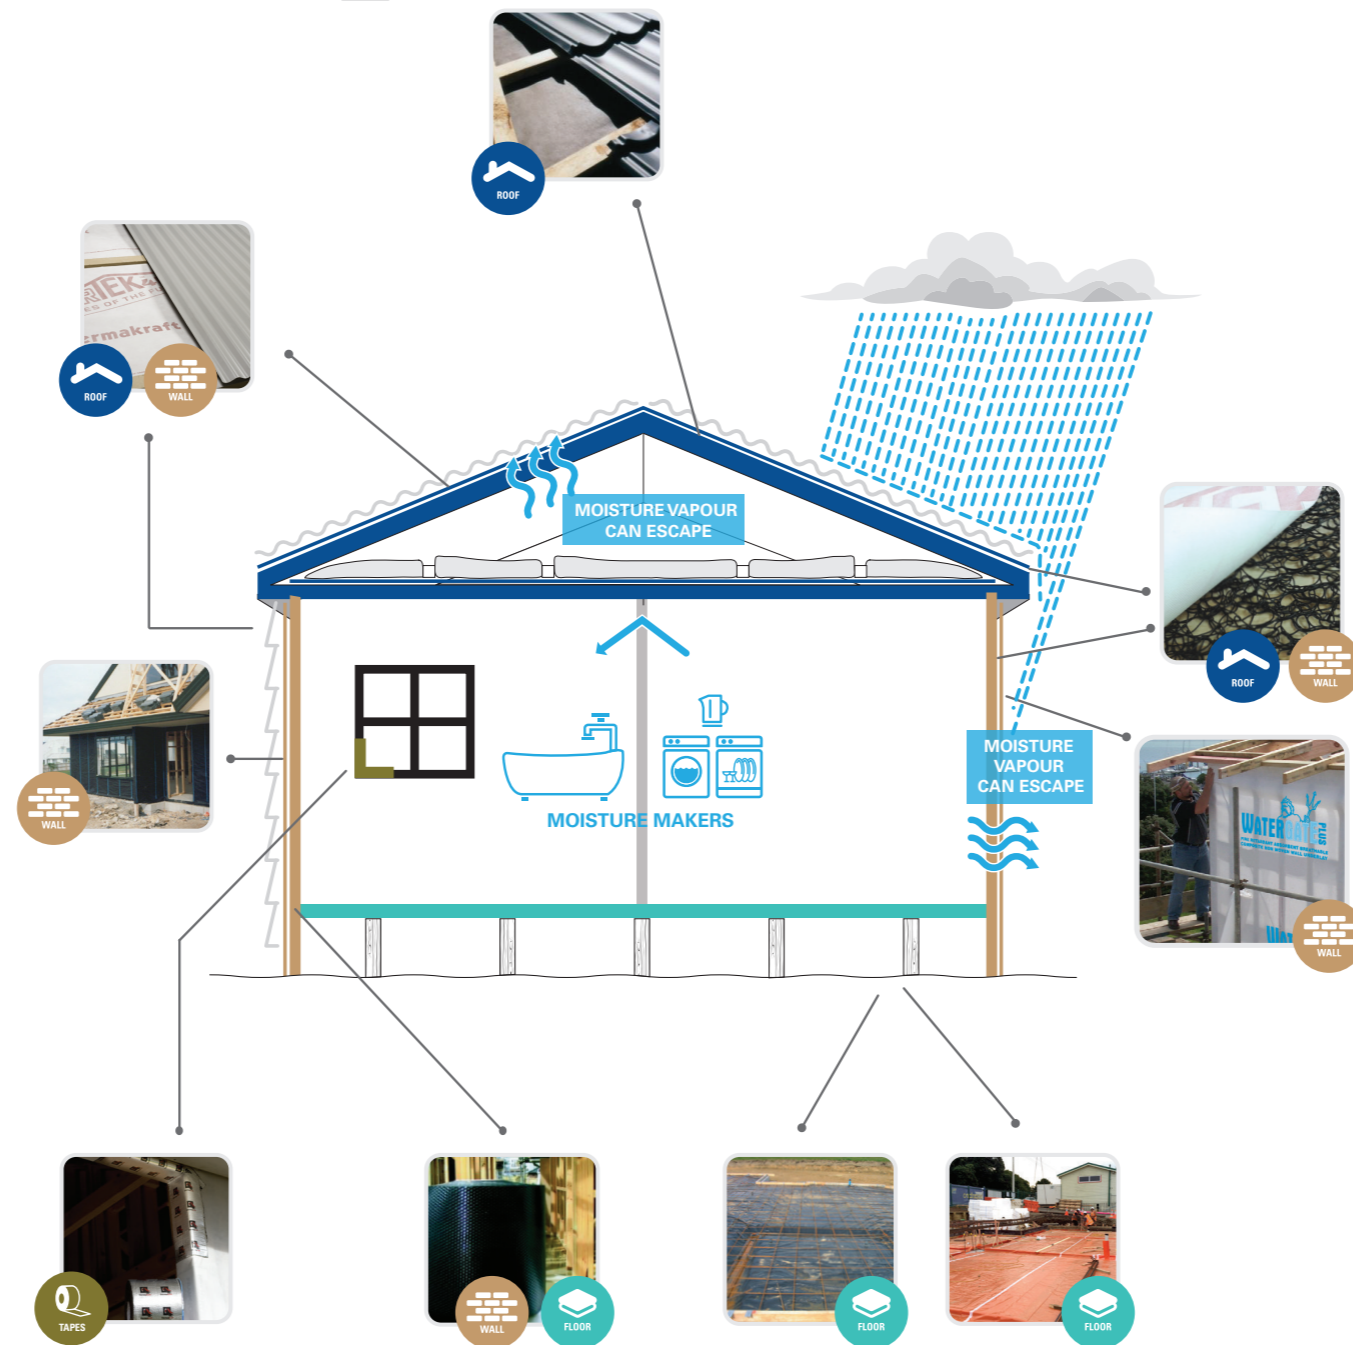

INTELLIGENT MEMBRANES

for the  
BUILDING  
INDUSTRY

# Warm ✓ Safe ✓ Dry ✓

The miracle product that every home needs.

## Thermakraft™

Thermakraft's large and varied range of products are available through all leading hardware stores, building supplies, timber merchants and roll formers throughout New Zealand.

### SYNTHETIC UNDERLAY

- Covertex 407**  
Thermakraft's #1 Commercial and Residential heavy weight self support roof underlay.
- Covertex 405**  
Heavy weight self support roof underlay.
- Covertex 403 Plus**  
Designed as a means of managing condensation, water vapour transfer and water ingress in roof applications.
- Thermakraft 401**  
A lightweight high strength underlay suitable for use unsupported where fire retardancy is not required.

### BITUMINOUS UNDERLAY

- Thermakraft 215**  
Self supporting roofing underlay is specifically designed for use in Domestic and Commercial type buildings.
- Thermakraft 213**  
Heavy duty bitumous underlay.

### FOIL UNDERLAY

- Thermabar 397**  
Used to line walls and under roofs in commercial and industrial buildings to give a clean white finish.
- Thermabar 344**  
Provides a quality white aesthetic finish, increasing light diffusion and reflection.
- Thermabar 346**  
Provides thermal insulation and a vapour control layer.

### POLYTHENE UNDERLAY

- Thermathene Natural**  
Designed for use as an anti-condensation barrier beneath skylights.
- Vapor Shield 101**  
Moisture and vapour control layer.

### DRAINAGE / NETTING

- Drainage Matt**  
Used as an air separation layer between fully sarked roof and roof cladding.
- Ausmesh Safety Netting**  
For use in commercial roof applications where falling from high hazards exist.
- Soffit Wrap 600**  
Offers a high degree of water resistance, with a high level of water vapour permeability.

### SYNTHETIC UNDERLAY

- Watergate Plus**  
Offers a high degree of water resistance, with a high level of water vapour permeability, which exceeds all others in performance criteria.
- Steelwrap 290**  
Designed especially for use in steel frame construction.
- Covertex 403 Plus**  
Designed as a means of managing condensation, water vapour transfer and water ingress in wall applications.
- Thermakraft 220**  
For use on timber framing behind exterior wall cladding.

### BITUMINOUS UNDERLAY

- Thermakraft 213**  
Specifically designed for use in Domestic and Commercial type buildings.

### FOIL UNDERLAY

- Thermabar 397**  
Used to line walls in commercial and industrial buildings to give a clean white finish.

### DRAINAGE

- Drainage Matt**  
Used as an air separation layer between external wall underlay and exterior cladding.

### STRAPS

- Stud Strap**  
For use as a support for non-self support Roof Underlays, and to restrict insulation bellowing of Wall Underlays in Drained Cavity applications.
- Thermastrap 201**  
For use as a support for non-self support Roof Underlays, and to restrict insulation bellowing of Wall Underlays in Drained Cavity applications.

### DAMP PROOF COURSE

- Perrimeter**  
Designed for use as a separator between timber and metal from concrete, masonry or brick.
- Supercourse 500**  
Hi-impact polyethylene film, embossed on both sides.

### DAMP PROOF MEMBRANE

- Thermathene Black 250um**  
Used as a Concrete Underlay and Damp Proof Membrane (DPM).
- Thermathene Orange 300um**  
Tear resistant heavy duty polythene film used as a Damp Proof Membrane.

### WINDOW FLASHING TAPES

- Aluband Window Sealing System**  
Benefits of heavier bituminous adhesive and a foil backing offering high strength bond and excellent abrasion resistance.
- Aluband Xtreme**  
High Performance self-adhered flashing tape. Suitable for window and door installation and other wall penetrations.
- Orange Corner Moulds**  
Used in conjunction with Thermakraft window sealing tape system.

### PENETRATION SEALS

- Multi-Fit Cable and Pipe Seals**  
Unique Multi-Fit system and high strength adhesion for complete air tightness.

### JOINING TAPES

- Aluband Xtreme**  
High Performance self-adhered flashing tape. Suitable for window and door installation and other wall penetrations.
- Foil Tape 150**  
Metalised finish made from tough polypropylene with the latest in acrylic technology adhesives.
- White General Purpose Tape**  
Can be used on synthetic wall and roof underlays, foil products or damp proof membranes such as Thermathene.
