ECO PACK

The NEW cardboard Eco Pack will replace the current plastic tub

What is the Eco Pack?

The Eco Pack is a cardboard packaging replacement for our current plastic tub range. The Pack is a very thick, dual layer corrugated cardboard box. It is an environmentally friendly and recyclable alternative to the current plastic tub range.

- Recycling: Cardboard can be 100% recycled
- Stronger: Our dual layer cardboard grade carton is incredibly strong, so strong in fact it can hold twice as much weight as the previous plastic tub.
- 2 handles: Because our anchors have significant weight to them, our Eco Packs will have punched hand grip holes.
- Each carton has an application graphic. This lists the bottom plate program anchor options / applications and part codes.
