CONCEALED MAGNETIC CATCH

Heavy Duty Concealed Magnetic Catch suitable for full size doors (e.g. wardrobe/cupboard, double internal doors).

- Can be used anywhere a roller/ball catch etc. would normally be fitted.

- As magnets don't touch (after installation)

- the catch will never wear out!
- Lifetime guarantee (for magnetism).
- can be painted over.

- No latch noise when opening and shutting door (unlike a roller/ball catch)

- Completely concealed when door closed, no unsightly protruding strike plate lip (unlike a roller/ball catch).

- Can be used to help keep problem doors shut (e.g. with weak door closers, electric strikes, weak roller mortice locks, double sliding doors).

- Quick and easy to install - No chiseling required.

Ezifit s/steel housing cup automatically sets the magnets perfectly parallel to each other, essential for precise power adjustment.

- Power adjustment packers increase magnetic holding strength by inserting power adjustment packers (inside housing, under magnet) as required. (See picture). Supplied in four sizes; 0.5mm - 3mm thick, for precise power adjustment.

- Self Adhesive/Magnetic Cover Plate (Brushed S/Steel)

- Protects magnets from impact damage during installation.
- Protects magnets from corrosion.
- Conceals magnet and screw head for a more attractive finish.

- Poron Xrd Foam impact absorption pad

- Use (esp. with double doors) to further reduce impact noise and bouncing of door on frame when shutting.
- Low compression set - After impact, foam pad will return to its original thickness indefinitely.

Power Adjustment Guide:

NZ Patent No. 568456

Aus. Patent No. 2009249902

Drill Ø23-24 mm holes approx 10mm deep into door and jamb to accept s/steel housing cups.
(Recommended - Precision FB-23 Forstner Drill Bit)

**DESIGNED AND ASSEMBLED IN NZ USING NZ
MADE AND IMPORTED COMPONENTS.**
