

WARRANTY

Yunca, a 100% New Zealand-owned family business, has a comprehensive research and development programme.

All critical components and air flow controls have been rigorously tested for safety and peak efficiency.

Yunca Heating guarantee each new firebox, to the original purchaser, will be free from defects both in material and workmanship for a period of 5 years (60 months) for all hybrid/multifuel burners. All consumables (e.g. seals) and replaceable parts (e.g. grates, gas and electrical components) are warranted for a period of 12 months from the date of purchase. Please refer to the operating and warranty instructions for full details.

YUNCA HEATING

The Yunca Group is wholly New Zealand owned and is based in Invercargill, Dunedin and India. Established in 1977 by Terry Young under the philosophy "Quality First", the Group has continued to expand.

The design, manufacture and distribution of a range of domestic solid fuel heating appliances have been one of the Group's core activities for over 40 years.

COOK-TOP

With the exception of the Blenz and Hybrid Multi Inbuilt, the top is designed to allow you to either cook or keep food warm. (Cooking directly on any enamel grill top may damage the surface.) The enamelled top grill of the Blenz may be removed for direct access to a cook-top surface.

All cook-top surfaces should be treated with a stove blackening (or high temp paint) from time to time to keep it looking good.

PANEL FINISH

Yunca uses a vitreous enamel finish for panel colours – with some exceptions. The enamel finish is able to withstand extreme heat and will not deteriorate over time. Enamel panels may be easily cleaned by buffing with a soft cloth. A foamed or non-abrasive cleanser may be used for the stubborn soiling. Polish afterwards with a soft, dry cloth.

Some models (Monte and Monte Euro hybrid/multifuel burners) that are sold with an enamel finish option come with only the side panels enamelled in the colour of choice. The door and hearth (ash lip) panel are painted, and therefore may need to be periodically touched up with stove blackening (or high temp paint) to maintain the desired finish in the same way as the cook-top is maintained.

Hybrid/Multifuel Burners

Available from:

April 2017

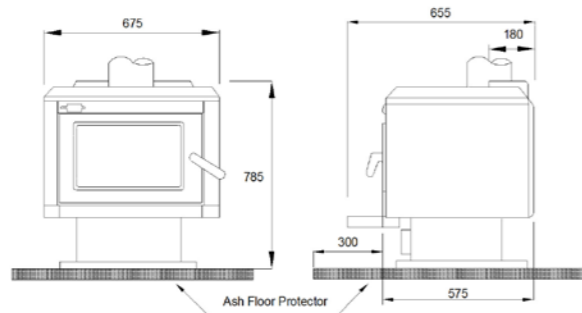

Blenz

The BLENZ Hybrid Multifuel Burner is designed to blend multiple types of fuel for optimal all day/overnight performance.

SPECIFICATIONS

- HEAT OUTPUT – Estimated 18kW maximum.
- FLOOR PROTECTOR CLEARANCE – Ash hearth made from non-combustible materials. Front 300 mm, side 125mm.
- WALL CLEARANCES – WITH YUNCA STD FLUE GUARD From combustible surfaces: rear 175mm, side 325mm, and angled 60mm.
- FIRE – 8mm plate-steel cook top (remove grill to expose), 5mm plate-steel firebox, fully lined with 40mm refractory firebricks.
- OPTIONAL EXTRAS – Stainless Water Booster

- Standard Colour** GUNMETAL BLACK (Vitreous Enamel)
- Optional Colour** CHARCOAL (Vitreous Enamel)

Please note that colour range shown is limited by the printing process and are given as a guide only.

The Monte

Monte

The MONTE Hybrid Multifuel Burner has a fresh modern design combined with a convenient cook-top and the ability to burn wood, coal, lignite or a combination of all.

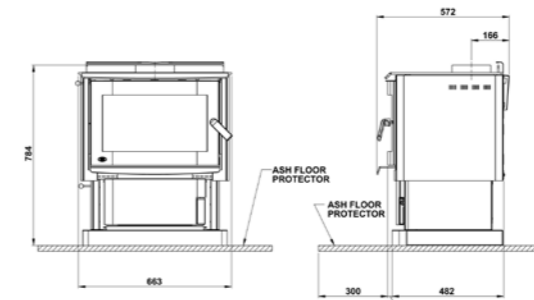

SPECIFICATIONS (for both Monte models)

- HEAT OUTPUT – Estimated 20kW maximum.
- FLOOR PROTECTOR CLEARANCE – Ash hearth made from non-combustible materials. Front 300 mm, side 125mm.
- WALL CLEARANCES – WITH YUNCA STD FLUE GUARD From combustible surfaces: rear 150mm, side 400mm, and angled 200mm.
- FIRE – 8mm plate-steel cook-top; 5mm plate-steel firebox, fully lined with 40mm refractory firebricks.
- OPTIONAL EXTRAS – Stainless Water Booster

Colour options for both the Monte & Monte Euro shown far right

Please note that colour range shown is limited by the printing process and are given as a guide only.

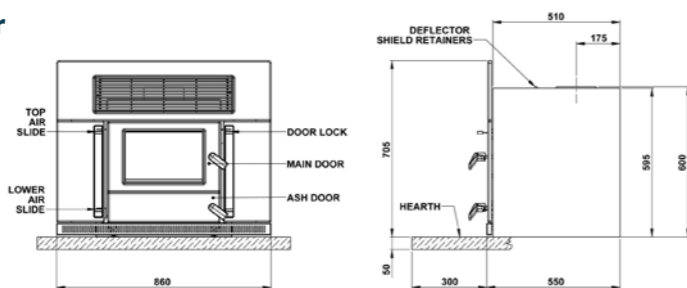

Hybrid Multi INBUILT

The HYBRID MULTI INBUILT Burner is perfect for installation into new or existing masonry chimneys and where space is limited.

SPECIFICATIONS

- HEAT OUTPUT – Estimated 16kW maximum.
- FLOOR PROTECTOR CLEARANCE – Hearth made from non-combustible materials giving heat resistance equal to concrete or brick at least 50mm thick. Front 300 mm, side 150mm.
- MANTEL – A minimum of 600mm is required from the top of the fascia panel to any heat sensitive material.
- FIRE – 5mm plate-steel firebox

- Standard Colour** GUNMETAL BLACK (Vitreous Enamel)
- Optional Colour** CHARCOAL (Vitreous Enamel)

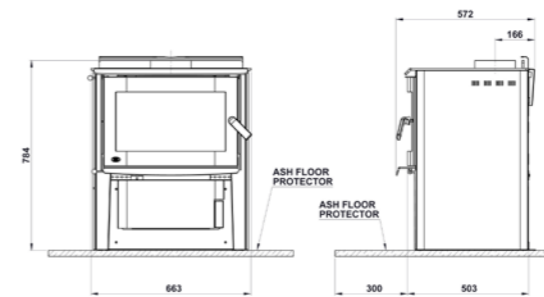

Please note that colour range shown is limited by the printing process and are given as a guide only.

Monte Euro

The MONTE EURO Hybrid Multifuel Burner is a merging of styles to give a fresh European look.

COLOUR OPTIONS (for both Monte models)

- Standard Colour** GUNMETAL BLACK (VITREOUS ENAMEL)
- Optional Colours** (VITREOUS ENAMEL)
 - ARCTIC WHITE
 - SILVER GREY
 - SAFFRON
 - CANARY
 - CHOCOLATE
 - BLUE GREY
 - WASABI
 - SAGE
