Product Manual 2018

Icons Menu

To help you to identify important product features, we have placed icons beside each product. When you're browsing through this brochure, simply fold out this flap so you can quickly refer to each icons meaning.

ALL PRESSURE DESIGN
Suitable for all water pressure installations (mains, unequal and equal low) above 35kPa.

COOL-TO-TOUCH TECHNOLOGY
Ensures the exterior never gets warmer than the mixed water temperature resulting in a safer shower environment.

MAINS PRESSURE DESIGN
Suitable for mains water pressure installations above 150kPa.

EASY DIY INSTALLATION
Replace your shower handset on your own – no need for a plumber.

EQUAL LOW PRESSURE DESIGN
Suitable for equal low water pressure installations 120kpa and below.

FLEXIBLE RAIL INSTALLATION
Adjustable mounting brackets for easy retrofit to existing installation holes.

ECO BRASS®
Made with lead-free EcoBrass® to protect water quality and for enhanced corrosion resistance.

CONTROL WATER DIRECTION
The directional aerator includes a built-in swivel that enables you to manually adjust the direction of your water and minimise splashback. (Perfect for taps that sit directly over the sinkhole).

THERMOSTATIC MIXING TECHNOLOGY
Thermostatic mixing technology monitors and continually adjusts the temperature level preventing cold shocks or hot scalds.

SWIVEL SPOUT
Smooth, elegant and simple to use, our swivel spouts give you 360° control of your water flow.

LIFEMARK™ APPROVED PRODUCT
Designed to be easy to use and accessible for everyone, regardless of age and ability.

DZR BRASS
Dezincification Resistant (DZR) brass bodies last longer and help maintain water quality.

Creating amazing water experiences since

1886

Creating amazing water experiences is what we do every day at Methven, and have done since 1886 when George Methven first started as a producer of brass and iron hardware in Dunedin, New Zealand.

Today, Methven is world renowned for beautifully designed, award-winning showers, taps and valves. It all stems from our knowledge of water. Our unique history as an island nation has taught us to take care of nature's most precious resource.

Over the years we have learned how to harness its power to cleanse, calm, refresh and invigorate. And it's this expertise - combined with our passion for design and innovation - that fuels our ongoing mission to create amazing water experiences, just for you.

Lifemark
CERT™

PRODUCT PARTNER

Lifemark™ independently certifies homes and products that have been designed to be easy to use and accessible for everyone, regardless of age and ability.

A Lifemark™ Approved Product is tested to meet age friendly Lifemark™ Standards of usability adaptability and safety.

Water pressure system

Choose the right product for your pressure system.

Most Methven products are suitable for all pressure installations (above 35kPa). However, not all products sold in New Zealand are capable of handling all pressures, so always check the technical details.

To determine the individual pressure system, please refer to the hot water cylinder. Alternatively, use this handy chart:

**ALL PRESSURE INSTALLATIONS
(Mains, Unequal and Equal Low Pressure)**

For all pressure installations (above 35kPa).
Look for Methven products with this icon.

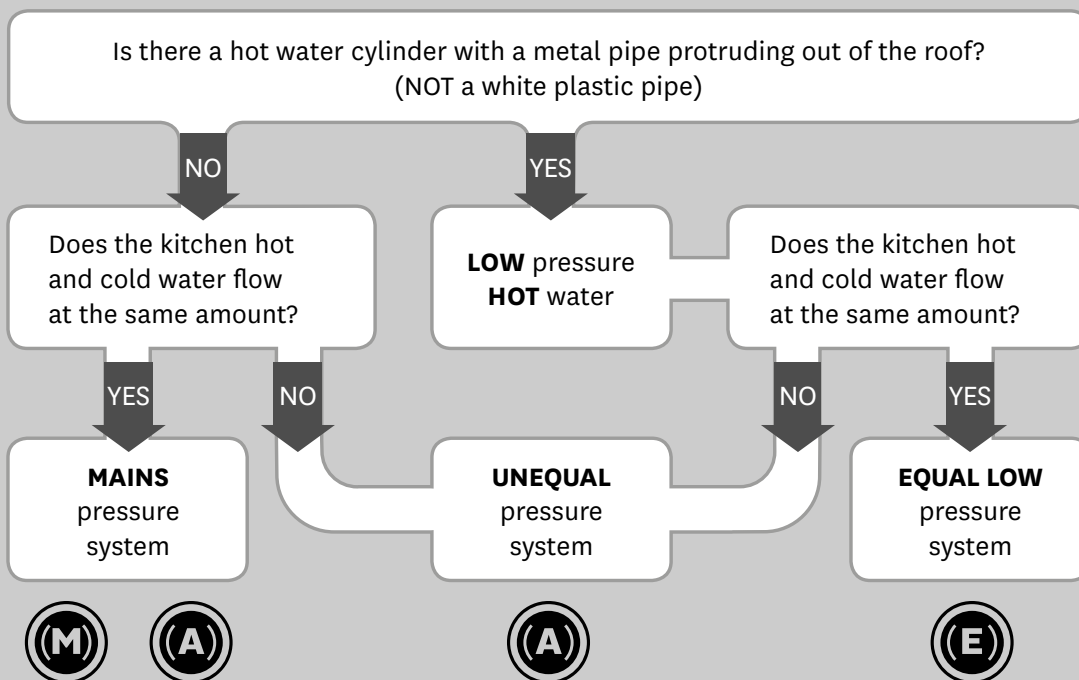

MAINS PRESSURE INSTALLATIONS

For mains pressure installations only (above 150kPa).
Look for Methven products with this icon.

EQUAL LOW INSTALLATIONS

For equal low pressure installations only (120kPa and below).
Look for Methven products with this icon.

Guaranteed quality

We're proud to stand by each and every one of our products with a warranty.

The reason for this is simple: we manage the design and engineering of our products, so that we have control over the process from start to finish. We constantly push for perfection. In fact there is not a single component that hasn't been considered and refined for quality and durability.

Your shower experiences

Your shower should be a highlight of your day, transforming body and mind. But everyone has their own idea of the perfect shower. That's why at Methven we've spent a huge amount of time researching people's preferences, and creating innovations that turn your shower time into an amazing experience, every time.

Aurajet®

Aurajet® is our most awarded product yet. It's our most advanced, most invigorating shower experience ever, that turns conventional showering on its head.

Invisible nozzles generate individual jets of water that collide against precisely angled surfaces hidden within the contours of the unique halo-shaped showerhead.

The result is a highly efficient shower with 20% more spray force and twice the amount of water contact on your skin than a conventional shower*. All this adds up to an enveloping warmth that has to be felt to be believed, and a heavenly experience that puts you in a great space, every time you shower.

* Compared to a Methven Conventional Shower at 9L per minute.

Satinjet®

Turn an everyday ritual into a shower experience with award-winning Satinjet® technology from Methven.

Unlike conventional showers, Satinjet® uses unique twin-jet technology to create optimum water droplet size and pressure, with over 300,000 droplets per second. The result is an immersive, full-body shower sensation. And because we know everyone has their own idea of the perfect shower, Methven has crafted a range of Satinjet® showers you can match to your individual needs – from gentle and enveloping to powerful and invigorating. Satinjet® from Methven – prepare yourself for a truly sensational shower experience.

Airstream™

Welcome to Airstream™ from Methven. A refreshing combination of air and water that delivers a gentle, rain-like feel to your showering.

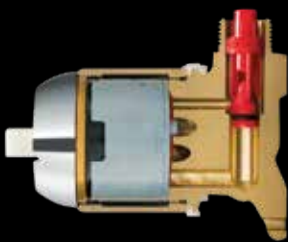

Fully integrated into the base of the handset, Airstream technology allows air to be drawn in and mixed with water at high pressure. Each air infused droplet then emerges from the showerhead as a larger, softer rain-like drop.

The result is a more refreshing all-over shower experience.

Airstream from Methven - a simple and smart choice for any bathroom shower experience.

Our tapware and mixer innovations

At Methven we like to make things better. So we spend a great deal of time and effort on research and development to improve our products. Here are just some of our success stories.

FASTFLOW®
Unrivalled performance on unequal pressure installations

Our unique Fastflow® technology delivers unrivalled performance on unequal pressure installations. It has been used and trusted by New Zealand plumbers for over 20 years.

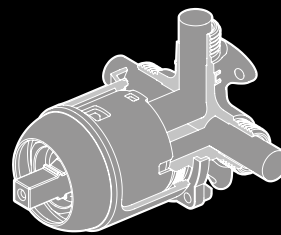

Using precision engineered jets, Fastflow® ingeniously uses high pressure cold water velocity to draw the low pressure hot water through at an increased rate. This provides maximum water flow at the optimum temperature.

SAFEFLOW®
The answer to safer showering

Safeflow is a temperature and flow regulator that is operated by a simple-to-use single lever. It delivers a stable showering temperature, even with erratic hot and cold pressure.

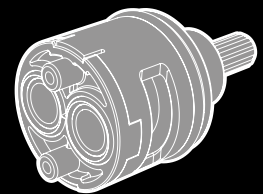

The integrated Thermostatic Cartridge mixes the maximum water temperature to 45°. Precision ceramic discs add incrementally more cold water to the flow as you choose, resulting in a very accurate and stable output temperature. If the cold water cuts off for any reason, the thermal element quickly expands to shut off the hot water, preventing exposure to scalding water straight from the water heater.

HYPERFLOW™
Faster flow from low pressure systems

An ingeniously simple solution for faster-filling baths and greater shower flow. Upgrade your shower and bath mixers with Methven Hyperflow™ to get significantly better water flow from your existing low pressure plumbing.

**Designed specifically for Equal Low Pressure plumbing systems: check with your plumber if this solution will work for you.*

CERAMIC DISCS
Reliable technology that saves water – and money

Ceramic discs ensure your taps work well, are safe to use and help you to conserve water.

A more durable replacement for conventional washers, ceramic discs won't wear out - which means dripping taps are a thing of the past.

The Aio shower has an intriguing contemporary look and, within its distinctive halo-shaped showerhead, employs groundbreaking Aurajet technology to deliver a full-bodied spray with maximum body contact and all-over warmth.

ULTRA WIDE COVERAGE

A full-bodied spray for all-over warmth and maximum body contact.

METHVEN

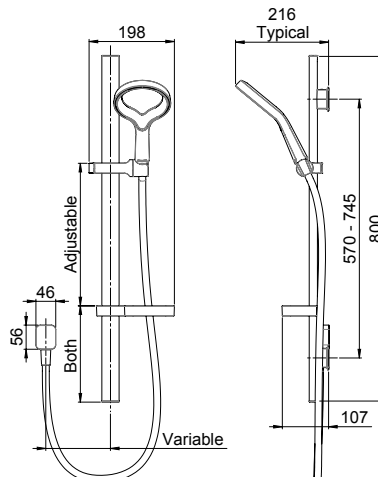

Aurajet®

- Methven's most advanced, most invigorating shower experience ever
- Delivers a full body spray that maximises body contact and all over warmth
- 20% more spray force and twice the amount of water on your skin compared to a Methven conventional shower at 9L/min
- Operates on mains pressure only above 100kpa
- Designed and engineered in New Zealand

Aurajet®

AIO RAIL SHOWER

- Suitable for mains pressure installations only (150 - 500kPa)
- Ultra wide coverage
- Adjustable rail mountings 570 - 745mm
- Sturdy and stylish soap dish and designer Euro brass elbow included
- 1500mm smooth skin hose with twist free swivel nut
- WELS Three Star rated on mains pressure (9.0L/pm flow rate)

EcoBrass® sets a new standard in tapware

Aio Tapware utilises EcoBrass®, a revolutionary, high strength material that is lead and heavy metal free.

The concept behind Aroha was to organically link the handle and body, as if they were one form. The floating handle gracefully rotates over the tap body, making Aroha a pleasure to use and behold.

AROHA BASIN MIXER

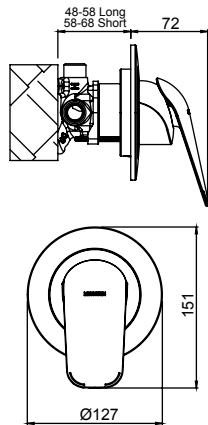

- Suitable for all pressure installations (*above 35kPa*)
- Ceramic cartridge (SPO33805)
- Slim stream shaper aerator with directional swivel
- Non-swivel spout
- Flow restrictor on cold inlet for unequal pressure
- Stainless steel flexible hose
- 35mm diameter bench hole required, integrated base ring
- Dezincification Resistant (DR) brass bodies help ensure greater durability, safer water and NZBC compliance
- Twin stud mounting
- All connections 1/2" BSP Female
- O-ring seal on base
- WELS Four Star rated on mains pressure (6.5L/pm flow rate)

METHVEN Fastflow®

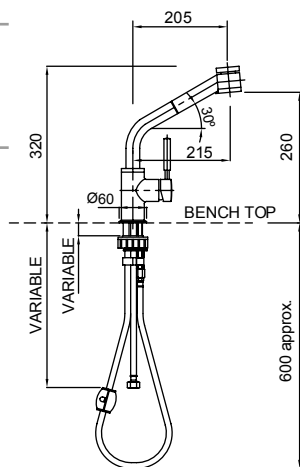

Unrivalled performance on unequal pressure installations

Our unique Fastflow® technology delivers unrivalled performance on unequal pressure installations. It has been used and trusted by New Zealand plumbers for over 20 years. Using precision engineered jets, Fastflow® ingeniously uses high pressure cold water velocity to draw the low pressure hot water through at an increased rate. This provides maximum water flow at the optimum temperature.

1. Precision engineered jet uses a venturi system to draw the hot water through at an increased rate
2. Hot waterway flows around the outside of the jet
3. Cold waterway flows through the inside of the jet

CENTIQUE HI RISE VEGIE SPRAY SINK MIXER

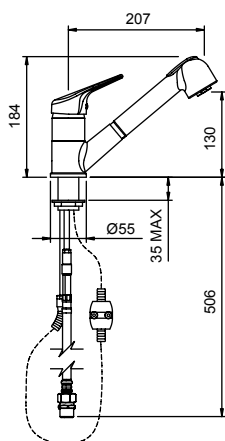

Chrome

HR2030

- Suitable for mains pressure installations only (*above 150kPa*)
- Ceramic cartridge with adjustable temperature limit setting (*SP033510*)
- 2 function (*spray and aerated flow*), easy to grip pull out spray
- 180° degree spout rotation (*with product installed with handle on the right only*).
- Extra spout height to allow you to fill and clean extra large pots
- Pull out spray has dual check backflow preventer built in, complies with NZBC G12
- Inlet connection ½" BSP Female
- 40mm bench hole required; Max bench thickness 30mm

MMHPUSCP

Our story begins in New Zealand back in 1886 with the forward thinking and one of a kind design engineer George Methven. He was a man of character who always had a passion for pioneering amazing water experiences. This pioneering spirit continues with us today in everything we do, driving us to think differently and challenge convention to create thoughtful, elegant products that transform your day.

MINIMALIST SINK MIXER

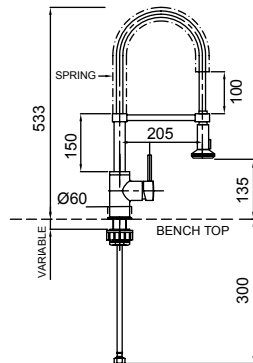

Chrome

MMKCP

- Suitable for all pressure installations (*above 35kPa*)
- Ceramic cartridge with adjustable temperature limit setting (*SPO33510*)
- Installed using stainless steel flexible hoses
- Hose end connections 1/2" BSP Female
- Non-return on hot inlet
- Swivel spout with aerator
- O-ring seal on base
- 35mm diameter bench hole required
- Twin stud mounting
- WELS Three Star rated on mains pressure (*8.0L/pm flow rate*)
- WELS Three Star rated on low pressure (*8.0L/pm flow rate*)

MINIMALIST PULL DOWN SINK MIXER

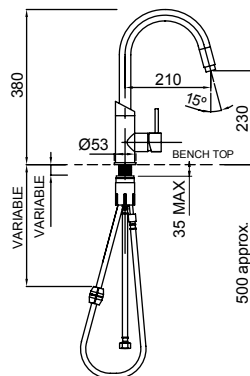

Chrome

MMKSPR

- Suitable for mains pressure installations only (*above 150kPa*)
- Ceramic cartridge (*SPO33550*)
- 2 function pull down spray (*spray and aerated flow*)
- Spring provides air break to comply with NZBC G12 to prevent backflow
- Swivel spout
- Inlet connection 1/2" BSP Female
- 35mm bench hole required; maximum bench thickness 30mm
- 40mm mounting nut
- Stainless steel flexible hose
- WELS Four Star rated on mains pressure (*7.0L/pm flow rate*)

MINIMALIST SINK MIXER WITH PULL OUT SPRAY

Chrome

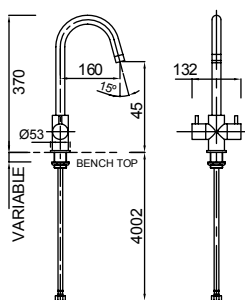

MMKHRPD

- Suitable for mains pressure installations only (*above 150kPa*)
- Ceramic cartridge with adjustable temperature limit setting (*SPO33510*)
- Single function aerated flow spray
- Swivel spout
- O-ring seal on base
- Inlet connection 1/2" BSP Female
- 35mm bench hole required; maximum bench thickness 30mm
- Stainless steel flexible hose
- Pull out nozzle has dual check valve backflow prevention built in, complies with the requirement of NZBC G12
- WELS Four Star rated on mains pressure (*7.0L/pm flow rate*)

Inspired by Italian design, this elegant tapware features strict geometry and intersecting cylinders. A simply beautiful range that will enhance any room with its graceful forms.

MINIMALIST SINK MIXER WITH TWIN HANDLES

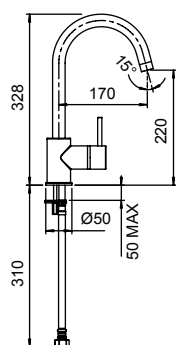

Chrome

MMKHRTW

- Suitable for all pressure installations (*above 35kPa*)
- ¼ turn ceramic headworks, (*SP108C & SP108H*)
- Modern sleek design
- Swivel spout
- Inlet connection ½" BSP Female
- 35mm bench hole required; maximum bench thickness 30mm
- Stainless steel flexible hose
- WELS Three Star rated on mains pressure (*8.0L/pm flow rate*)
- WELS Three Star rated on low pressure (*9.0L/pm flow rate*)

MINIMALIST GOOSENECK SINK MIXER

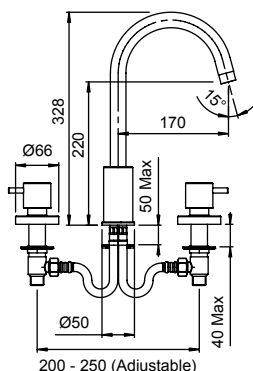

Chrome

MMKHRCF

- Suitable for all pressure installations (*above 35kPa*)
- Ceramic cartridge with adjustable temperature limit setting (*SP033510*)
- Installed using stainless steel flexible hoses
- Hose end connections ½" BSP Female
- Non-return on hot inlet
- Swivel spout with aerator
- 38mm diameter bench hole required
- O-ring seal on base
- WELS Three Star rated on mains pressure (*8.0L/pm flow rate*)
- WELS Three Star rated on low pressure (*8.0L/pm flow rate*)

MINIMALIST 3 HOLE SET

Chrome

MMBHRCP

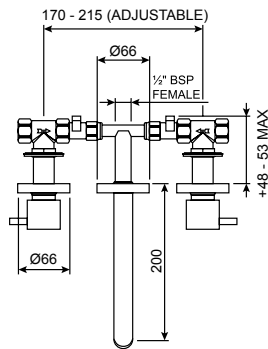

- Suitable for all pressure installations (*above 35kPa*)
- 15mm ¼ turn ceramic disc headworks (*SP106H & SP106C*)
- Swivel spout with aerator
- 35mm diameter bench holes required spaced at 120mm centres (*i.e. 240mm between the two outer holes*)
- Connection ½" BSP Male
- WELS Three Star rated on mains pressure (*8.0L/pm flow rate*)
- WELS Two Star rated on low pressure (*12.0L/pm flow rate*)

We're proud to stand by each and every one of our products with a warranty. The reason for this is simple: we manage the design and engineering of our products, so that we have control over the process from start to finish. We constantly push for perfection. In fact there is not a single component that hasn't been considered and refined for quality and durability.

MINIMALIST 3 HOLE WALL MOUNTED SET

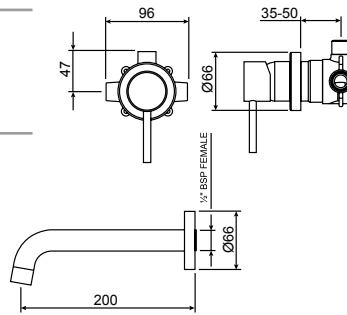

- Suitable for all pressure installations (*above 35kPa*)
- 15mm ¼ turn ceramic disc headworks (*SP106H & SP106C*)
- Pipe connections ½" BSP Female
- Fixed spout with aerator
- WELS Three Star rated on mains pressure (*8.0L/pm flow rate*)
- WELS Two Star rated on low pressure (*12.0L/pm flow rate*)

METHVEN

Safeflow®

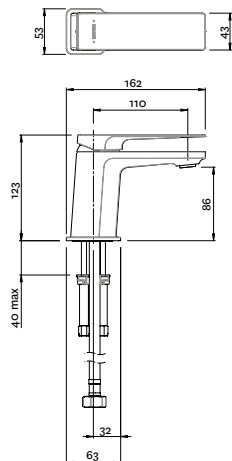

The answer to safer showering

Safeflow is a temperature and flow regulator that is operated by a simple-to-use single lever. It delivers a stable showering temperature, even with erratic hot and cold pressure. Precision ceramic discs add incrementally more cold water to the flow as you choose, resulting in a very accurate and stable output temperature to a maximum 45°. If the cold water cuts off for any reason, the thermal element quickly expands to shut off the hot water, preventing exposure to scalding water straight from the water heater.

The Surface tapware range combines clean lines with elegant floating planes, creating a refined contemporary architectural aesthetic.

SURFACE BASIN MIXER

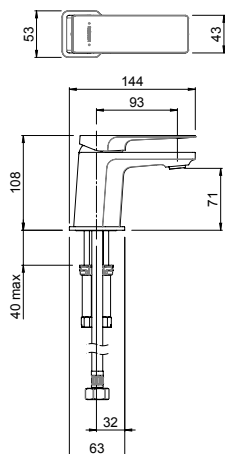

- Suitable for All pressure installations (*above 35kPa*)

TAHPC

We're proud to stand by each and every one of our products with a warranty. The reason for this is simple: we manage the design and engineering of our products, so that we have control over the process from start to finish. We constantly push for perfection. In fact there is not a single component that hasn't been considered and refined for quality and durability.

TAHI THERMOSTATIC DUAL FLOW MIXER

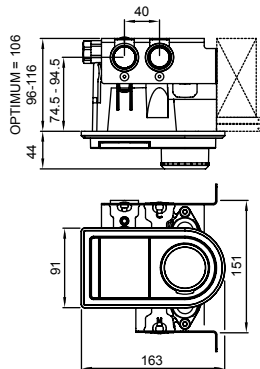

- Suitable for mains pressure installations only (150 - 500kPa)
- Metal faceplate
- Discreet low profile installation
- Easy to use large rotary control temperature setting (SP290111)
- Easy to use lift lever flow controls. (SP290129)
- Used where two separate outlets need to be controlled
- Connections 3/4" BSP Female
- Operating temperature - maximum 47°C
- Minimum temperature differential between either supply and mixed blend 12°C

Chrome TASHT2CP

TAHI THERMOSTATIC SINGLE FLOW MIXER

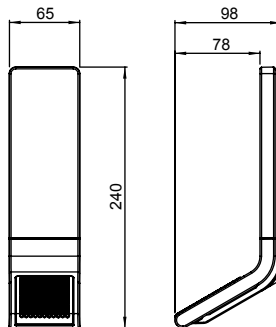

- Suitable for mains pressure installations only (150 - 500kPa)
- Metal faceplate
- Discreet low profile installation
- Easy to use large rotary control temperature setting (SP290111)
- Easy to use lift lever flow controls. (SP290129)
- Used where a single outlet only needs to be controlled
- Connections 3/4" BSP Female
- Operating temperature - maximum 47°C
- Minimum temperature differential between either supply and mixed blend 12°C

Chrome TASHT1CP

TAHI FOOTREST

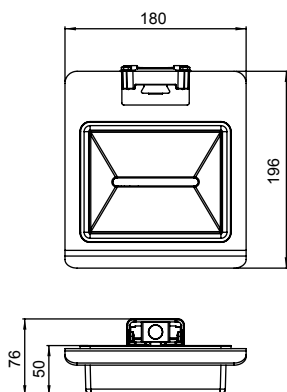

- Shaving legs made easy
- Installed separately
- Load bearing support required

NEFA

BY METHVEN

The Nefa range of safety and control valves offer a complete solution to the protection and regulation of the domestic water supply in both mains and low pressure installations.

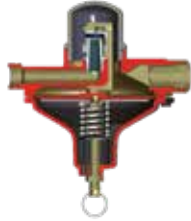

Nefa valves are designed and manufactured from the highest quality materials. All Nefa valves use DR brass bodies for strength and durability. Likewise all other components are manufactured from materials carefully selected for their suitability to use in demanding environments, to promote long life and fault-free service.

Install Nefa with peace of mind knowing that Nefa valves are backed by a comprehensive warranty from Methven and that they meet New Zealand standards and comply with the requirements of the New Zealand Building Code.

Nefa Water Valve Technology ensures water is delivered at a controlled pressure and safe temperature in domestic installations. Nefa valves are designed in New Zealand by Methven and comply with the requirements of the New Zealand Building Code.

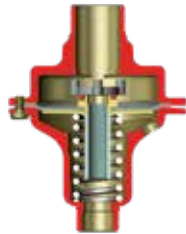

NEFA PRESSURE REDUCING FEED VALVE

- Superior flow rate
- Adjustable outlet pressure
- Silicone diaphragm and Jumper Washer, Acetyl valve seat, O-ring sealed
- Easily serviced
- Complies with the requirement of NZBC G12

15x20mm	3.7M Head	NFV3715			
15x20mm	7.6M Head	NFV7615			
			15x20mm	12.2M Head	NFV12215

NEFA PRESSURE RELIEF VALVE

- Forged Dezincification Resistant (DR) brass body
- Easy to service
- Withstands boiling temperatures
- Tamperproof, relief pressure permanently set
- Integral vacuum break in outer body
- Complies with the requirement of NZBC G12

15x20mm	3.7M Head	NRV37			
15x20mm	7.6M Head	NRV76			
			15x20mm	12.2M Head	NRV122

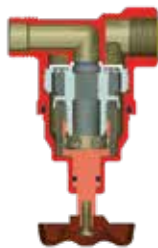

NEFA TEMPERATURE LIMITING VALVE

- Adjustable from 30°C to 65°C
- Fail safe: failure of the cold water supply causes valve to close down
- Equal pressure installation, 35 - 1000kPa
- Configured for easy installation
- Non-return fitted to stop thermosyphoning
- Serviceable
- Complies with the requirement of NZBC G12

20mm		NTLV
------	--	------

NEFA 3-IN-1 STOPCOCK 15MM

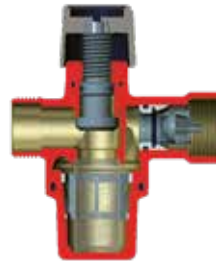

- Filter, Stopcock and non return
- Connections: Inlet 1/2" BSP Male
- Outlet 1/2" BSP Female
- Length 75mm, height 110mm
- 60 mesh stainless steel filter
- Maximum inlet pressure 2000kPa
- Complies with the requirement of NZBC G12

15mm		N311
------	--	------

Nefa Water Valve Technology ensures water is delivered at a controlled pressure and safe temperature in domestic installations. Nefa valves are designed in New Zealand by Methven and comply with the requirements of the New Zealand Building Code.

NEFA 3-IN-1 STOPCOCK 20MM

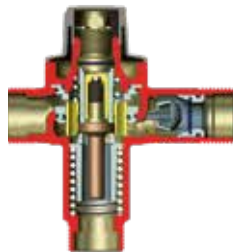

- Filter, Stopcock and non return
- Connections: Inlet 3/4" BSP Male
- Outlet 3/4" BSP Female
- Length 90mm, height 100mm
- 60 mesh stainless steel filter
- Max. inlet pressure 2000kPa
- Flow rate at 700kPa = 125l/m
- Complies with the requirement of NZBC G12

20mm

NE31120

NEFA MAINS PRESSURE TEMPERING VALVE

- Provides safe controlled water temperature to sanitary outlets
- Cast Dezincification Resistant (DR) brass body
- Fail safe: Failure of cold water supply causes valve to close and shut off hot flow
- Advanced polymers give greater resistance to calcium deposits
- Factory tested and set at 55°C adjustable from 35°C to 58°C
- Integral non-return
- Tamper proof adjustment special tool supplied
- Suitable for mains pressure only
- Maximum hot inlet temperature 90°C
- Complies with the requirement of NZBC G12

- Integral stop tap
- Integral non-return prevents back flow
- 60 mesh stainless steel filter can be serviced without shutting off any other valve
- Pressure compensated
- Adjustable set pressure, 100 - 600kPa
- Suitable for mains pressure up to 2000kPa
- Superior flow rate of 112l/m at 700kPa supply
- Cast Dezincification Resistant (DR) brass body
- Complies with the requirement of NZBC G12

20mm

NPC500

Our story begins in New Zealand back in 1886 with the forward thinking and one of a kind design engineer George Methven. He was a man of character who always had a passion for pioneering amazing water experiences. This pioneering spirit continues with us today in everything we do, driving us to think differently and challenge convention to create thoughtful, elegant products that transform your day.

NEFA COLD WATER EXPANSION VALVE

- Forged Dezincification Resistant (DR) brass body; stainless steel valve seat standard
- Incorporates outlet port for running direct equal pressure cold supply to TLV
- Integral non-return in body
- Easy to operate flushing mechanism
- Valve can be used as cylinder drain
- Complies with the requirement of NZBC G12

NEFA SOLAR MAINS PRESSURE INSTALLATION PACK

- NPC500 - Mains Pressure Inlet Control Valve (*Pressure limiting, isolation & filter*)
- NSTV20 - High Performance Solar Tempering Valve
- NECWE700 - Cold Water Expansion Valve (*with integral non-return*)
- BV78820 - 20mm M&F Ball Valve

NEMPKSOL		
----------	--	--

Nefa Water Valve Technology ensures water is delivered at a controlled pressure and safe temperature in domestic installations. Nefa valves are designed in New Zealand by Methven and comply with the requirements of the New Zealand Building Code.

NEFA LOW PRESSURE INSTALLATION PACK

- NFV7615 - Pressure Reducing Feed Valve 7.6m
- NRV76 - Pressure Relief Valve 7.6m (*with integral vacuum break*)
- NECWE76 - Cold Water Expansion Valve 7.6m (*with integral non-return*)
- NTLV - Temperature Limiting Valve
- N311 - Filter, Stop Cock and Non-return
- BV78820 - 20mm M&F Ball Valve

7.6m Head

NVKLP

NEFA MEDIUM PRESSURE INSTALLATION PACK

- NFV12215 - Nefa Pressure Reducing Feed Valve (*12.2m*)
- NRV122 - Nefa Pressure Relief Valve (*12.2*) with integral vacuum break
- NECWE120 - Nefa Cold Water Expansion Valve (*120kPa*) with integral non-return
- NTLV - Temperature Limiting Valve
- N311 Nefa - 3-in-1 Filter, Stop and Non-Return
- BV78820 - 20mm M&F Ball Valve

12.2m Head

NVK122

MAXIFLO PRESSURE REDUCING VALVE

- The Maxiflo pressure regulator has been designed for one step reduction of water pressure for:
 - Poultry watering systems
 - Animal watering systems
 - Irrigation systems
- Large diaphragm area provides sensitivity for fine control of outlet pressure

3m - 7m Head Plastic

PC6003

We're proud to stand by each and every one of our products with a warranty. The reason for this is simple: we manage the design and engineering of our products, so that we have control over the process from start to finish. We constantly push for perfection. In fact there is not a single component that hasn't been considered and refined for quality and durability.

STERILINE

BY METHVEN

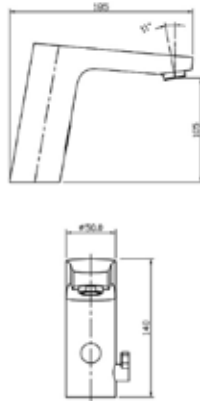

The Steriline range is manufactured in New Zealand from the highest quality brass. Bodies are made from brass forgings and castings, spindles from extruded brass bar and tubular spouts from seamless extruded brass tube.

The range is available in Chromium Plate which is suitable for general use in applications including laboratories, hospitals, retirement homes and educational facilities.

The Steriline range is manufactured in New Zealand from the highest quality brass. Bodies are made from brass forgings or castings, spindles from extruded brass bar and tubular spouts from seamless extruded brass tube. SENSOR TAP SQUARE

- Hands free infrared sensor activated
- Automatic shut-off water saving control
- Improves water and energy efficiency
- Easy to use, ideal for disabled or elderly
- Vandal and scratch resistant sensor window
- Easy to fit in new installation or retrofits
- Mains operated with battery pack back-up
- MEPS approved to AS/NZS 4665.1:2005
- Suitable for mains pressure
- Construction : Brass body
- Inlet Diameter : ½" BSP Female
- Working pressure: 150-700kPa
- Power Input : DC : 6V (4 x 1.5V AA Alkaline Battery)
AC : 220V – 240V; 50/60Hz
- Operating temperature : 5°C - 55°C
- Sensing : 27-31cm
- WELS Rating : 6 stars, 4.5l/min
- With Temperature Controller

ECHO SLIDE SHOWERS & SHOWER HEADS

Mains Pressure	150kPa	500kPa	Maximum temperature 70°C	
All Pressure	35kPa	500kPa	Maximum temperature 70°C	

STERLINE

All Pressure	10kPa	1000kPa		
Recommended	35-500kPa		Maximum temperature 80°C	
Steriline exception:	Spring Action taps - see page 88			

Methven recommends that the installation of a pressure limiting valve is required if supply exceeds 500kPa on all product ranges.
NB: New Zealand Building Code Clause G12 - Water Supplies specifies all outlets used primarily for personal hygiene shall deliver water at a safe temperature.

NEFA VALVE INSTALLATION SCHEMATIC DIAGRAMS

THESE DIAGRAMS ARE ISSUED AS A GENERAL GUIDE ONLY

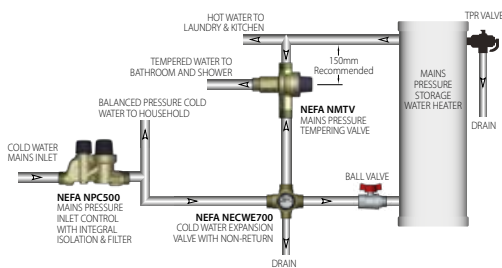

Refer to the water heater manufacturer's installation instructions for specific requirements.

Installation of valves should always be carried out by a qualified plumber and must comply with the requirements of the New Zealand Building Code and Local Territorial Authority. Refer to the New Zealand Building Code Compliance Document G12 Water Supplies available from the Department of Building and Housing.

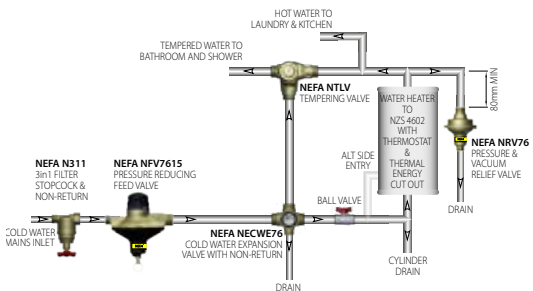

Further information can be found in the Nefa Reference Guide and the detailed instructions supplied with each valve.

If you have any questions please contact Methven Limited Customer Service free phone 0800 804 222

STANDARD WARRANTY

WARRANTY STATEMENT - METHVEN BRANDED PRODUCTS

Brand/Product	Domestic/Residential	Commercial
Methven Post 2011	20 Years	5 Years
Methven Pre 2011	5 Years	1 Year
Aurajet Showers	Lifetime	5 Years
Echo	5 Years	1 Year
Flexispray	5 Years	1 Year

The following Warranty Statements apply to products supplied by Methven Ltd to customers in the New Zealand market. This is in addition to Methven's responsibility to customers under all other statutory and regulatory requirements.

This Warranty Statement is applicable only to products purchased from Methven New Zealand.

GENERAL WARRANTY STATEMENT

The following Warranty Statement applies to all:

Methven branded showers, tapware, internal parts, surfaces, and hoses, and spare parts for Methven Branded Products (**Spare Parts**), supplied to customers in the New Zealand market.

The Warranty Statement does not apply to any other brands marketed and sold by Methven, such as Flexispray, Echo, Deva, Steriline, Starkie, Nefa and Shower Skincare products.

In addition to any other right or remedy that the purchaser or end user may have under any relevant consumer protection legislation, Methven undertakes to either **repair or replace** (at its discretion) Methven Branded Products and replace Spare Parts at an equivalent value of the product purchased if it is discovered that the product contains a **material defect which arose in the course of manufacture**.

1. Methven Branded Products - tapware and showers Installations Warranty (purchased post 1st September 2011)

Domestic/Residential Installations

A **20 year warranty** applies to all Methven Branded Products used in domestic/residential installations from date of purchase.

Labour, packaging, and freight costs incurred when Methven Branded Products are repaired or replaced are limited to the **first 10 years**.

Methven Spare Parts have a 10 year replacement guarantee (excluding labour and freight costs).

Aio/Aurajet Showers: A Lifetime Replacement Warranty applies for the lifetime of the original purchaser.

Methven branded alternative finishes, other than Chrome Plated and Brushed Nickel coatings, carry a **5-year coating warranty**.

Commercial Installations

A **5-year warranty** applies to Methven Branded Products and Spare Parts, from date of purchase used in hotels, motels and rest homes and includes labour, packaging and freight costs.

For all other commercial installations, a **12-month warranty** applies to Methven Branded Products and Spare Parts from date of purchase, and the warranty includes labour, packaging and freight costs.

For all commercial installations, Methven branded alternative finishes, other than Chrome Plated and Brushed Nickel coatings, carry a **12-month coating warranty**.

Warranty Conditions

Methven's domestic/residential installations warranty and commercial installations warranty for Methven Branded Products are subject to the following conditions:

- The product must not contain excessive debris (in-line filters must be installed)
- Proof of purchase (such as invoice or receipt) has to be provided.
- Methven's installation instructions must be followed. This includes operating conditions specified for temperature and pressure.
- The product must not have been tampered with or repaired in any way other than in accordance with this warranty.
- The product must not have been damaged by misuse, accident or neglect.
- Harsh detergents or abrasive cleaners must not have been used on the product.
- The product must have been installed in accordance with the relevant New Zealand Building/Plumbing Codes by a certified plumber.
- All warranty covered repair work is to be performed by a Methven representative, Methven's authorised service agent or plumber who has received a Methven authorisation number.

If the above conditions are not met, the warranty will be null and void.

Methven shall in no way be liable to the purchaser or end user of product for any loss, damage (direct, indirect or consequential), cost or expense suffered or incurred by that person (including, without limitation, any damage and/or labour charges incurred in installation, repair or replacement), other than as provided in the above provisions, under any relevant consumer protection legislation or as consented to by Methven in writing in advance.

2. Methven Branded Products - tapware and showers Installations Warranty (purchased pre 1st September 2011)

Domestic/Residential Installations

A **5 year warranty** is applicable on all tapware and showers used in domestic/residential installations, subject to the conditions set out below.

A non-transferable Life Time warranty is offered on ceramic mixing cartridges used with mains pressure.

Commercial Installations

A **12 month warranty** is applicable on all tapware and showers used in commercial installations, subject to the conditions set out below.

Warranty Conditions

Methven's shower and tapware warranties, for commercial installations, are subject to the following conditions. If these conditions are not met, the warranty will be deemed null and void.

- Proof of purchase (such as invoice or receipt) is to be provided.
- Methven's installation instructions must be followed. This includes operating conditions specified for temperature and pressure.
- The product has not been tampered with or repaired in any way.
- The product has not been damaged by misuse, accident, or neglect.
- The product does not contain excessive debris (in-line filters must be installed).
- All repair work is to be performed by Methven, its authorised service agent or plumber who has received a Methven authorisation number.

Methven shall in no way be liable to the purchaser or end user of product for any loss, damage (direct, indirect or consequential), cost or expense suffered or incurred by that person (including, without limitation, any damage and/or labour charges incurred in installation, repair or replacement), other than as provided in the above provisions, under any relevant consumer protection legislation or as consented to by Methven in writing in advance.

WARRANTY STATEMENT - ECHO & FLEXISPRAY BRANDED PRODUCTS

Domestic/Residential Installations

A **5 year warranty** applies to all Echo & Flexispray Branded Products used in domestic/residential installations from date of purchase. This warranty

includes labour, packaging, and freight costs incurred when Echo & Flexispray Branded Products are repaired or replaced.

Echo & Flexispray Spare Parts have a 5 year replacement guarantee (excluding labour and freight costs).

Commercial Installations

A **1 year warranty** applies to Echo & Flexispray Branded Products and Spare Parts, from date of purchase used in all commercial installations including hotels, motels and rest homes and includes labour, packaging and freight costs.

Warranty Conditions

Methven's domestic/residential installations warranty and commercial installations warranty for Echo & Flexispray Branded Products are subject to the following conditions:

- The product must not contain excessive debris (in-line filters must be installed)
- Proof of purchase (such as invoice or receipt) has to be provided.
- Methven's installation instructions must be followed. This includes operating conditions specified for temperature and pressure.
- The product must not have been tampered with or repaired in any way other than in accordance with this warranty.
- The product must not have been damaged by misuse, accident or neglect.
- Harsh detergents or abrasive cleaners must not have been used on the product.
- The product must have been installed in accordance with the relevant New Zealand Building/Plumbing Codes by a certified plumber.
- All warranty covered repair work is to be performed by a Methven representative, Methven's authorised service agent or plumber who has received a Methven authorisation number.

If the above conditions are not met, the warranty will be null and void.

Methven shall in no way be liable to the purchaser or end user of product for any loss, damage (direct, indirect or consequential), cost or expense suffered or incurred by that person (including, without limitation, any damage and/or labour charges incurred in installation, repair or replacement), other than as provided in the above provisions, under any relevant consumer protection legislation or as consented to by Methven in writing in advance.

WARRANTY STATEMENT - NEFA BRANDED PRODUCTS

The following warranty statement shall apply to all valving supplied to the New Zealand market. This includes, as stated, Methven's responsibility to the customer regarding all other statutory and regulatory requirements

1. Warranty

Where Methven valving is purchased for use or on-sale in the context of any business, Methven undertakes to either repair or replace (at its option) that valving, if it is discovered that such valving contains a material defect, which arose in the course of manufacture.

This undertaking shall not apply if:

- The above undertaking from Methven shall also apply to any purchaser of Methven valving who is a "Consumer" under the Consumer Guarantees Act 1993, in addition to any other right or remedy which such person may have under that Act.
- Methven shall in no way be liable to the purchaser or user of any valving, for any loss, damage (direct, indirect or consequential), cost or expense suffered or incurred by that person, otherwise than as provided in the above provisions, or as provided under the Consumer Guarantees Act 1993.
- The defect is brought to Methven's attention later than 2 years after the date of purchase, where the defect relates to washers, O-rings, lip and other seals and powder coating, or 5 years where the defect relates to any other valving componentry. Proof of purchase will be required.
- There is a failure by any person to follow Methven's installation instructions or the valving is used other than in accordance with Methven's specifications.
- Evidence cannot be produced which confirms that the relevant valving was purchased from a Methven authorised distributor.
- Repair work is performed on the relevant valving by a person other than Methven, its authorised service agents or any plumber who has not received authorisation prior to proceeding with the work.

WARRANTY STATEMENT - EXPORT

The following warranty statement shall apply to all tapware and valving supplied to the export market:

- Where Methven tapware or valving (tapware) is purchased for use or on-sale in the context of any business, Methven undertakes to either repair or replace (at its option) that tapware, if it is discovered that such tapware contains a material defect, which arose in the course of manufacture. This undertaking shall not apply if:
- The above undertaking from Methven shall also apply to any purchaser of Methven tapware who is a "Consumer" under the local Consumers Act, in addition to any other right or remedy which such person may have under that Act.
- Methven shall in no way be liable to the purchaser or user of any tapware, for any loss, damage (direct, indirect or consequential), cost or expense suffered or incurred by that person, otherwise than as provided in the above provisions.
- The guarantee does not cover either the consequences of incorrect installation, usage, maintenance or product care, which must be done according to the instructions included in the package; or damages resulting from collision or transportation or due to the presence of residues or foreign matters in the piping system.

If you have a defective product and wish to make a claim under this guarantee, please contact Methven Customer Service. New Zealand 0800 804 222 or Australia 1 800 035 330.

- The defect is brought to Methven's attention later than two years after the date of purchase. Proof of purchase will be required.
- There is a failure by any person to follow Methven's installation instructions or the tapware is used other than in accordance with Methven's specifications.
- Evidence cannot be produced which confirms that the relevant tapware was purchased from a Methven authorised distributor.
- Repair work is performed on the relevant tapware by a person other than Methven, its authorised service agents or any plumber who has not received authorisation prior to proceeding with the work.
