CARE & MAINTENANCE

Our bathroom products have been designed and manufactured using advanced techniques which assure durability and superior quality.

- To preserve the superior finish! and avoid blemishes, products should only be cleaned with water and a mild soap, then polished dry with a soft cloth.
- Never use abrasive or chemical cloths or cleaners, especially those that may contain acids or solvents.
- Regular cleaning will ensure that the superior finish of your bathroom product will be at its best always.
- If these instructions are followed you can be assured that the superior finish will last for many years to come.
