

400 series (punched) **500 series (unpunched)**

NOVAFLO™ is a single wall corrugated high density polyethylene land drainage pipe. NOVAFLO™ has been a leading brand name in the rural New Zealand land drainage market for over twenty years. During this time farmers have learnt to rely on Novaflo to deliver excellent drainage results. Improved soil structure, larger root systems, better fertiliser uptake and reduction in surface pugging are just some of the benefits that has made the use of NOVAFLO™ the product of choice for the land drainage requirements of New Zealand's farming community.

NOVAFLO™ is punched while NOVACOIL is the un-punched version of NOVAFLO™.

Features and Benefits

Cost Effective

NOVAFLO™'s single wall construction, light weight and ease of installation, makes this product the cost effective choice for land drainage.

Durable

NOVAFLO™ is made from tough high density polyethylene and has a long track record of being a quality product in New Zealand conditions.

Flexible

NOVAFLO™'s single wall corrugated construction gives it excellent flexibility and strength.

Versatile

NOVAFLO™ and NOVACOIL's diameter and coil size range, together with a range of compatible fittings, provide drainage solutions for a wide range of situations.

Compatible

NOVAFLO™ and NOVACOIL are compatible with the NEXUS™ range of pipe as well as a number of PVC pipeline products manufactured by Iplex Pipelines.

Quality

NOVAFLO™ and NOVACOIL are manufactured in New Zealand by Iplex Pipelines using a Quality Management System accredited to AS/NZS ISO 9001:2008.
