

HIGH IMPACT RESISTANT DOOR

Made in New Zealand and Specifically Designed in Conjunction with Kāinga Ora to Suit the Demands of Kāinga Ora Homes.

Kāinga Ora homes demand a door that is strong and incredibly impact resistant. However, they must be lightweight for safety and also cost effective.

Superior Doors and Kāinga Ora worked together, thoroughly testing a large range of different door designs, to develop the Kāinga Ora door. The final design has proven to meet and exceed all specified criteria of strength, extremely high impact resistance, structural integrity and appearance.

In the unlikely instance where the thick 4mm skin is cracked through an excessive impact, the 100% glue lamination and high density polystyrene core means repair is a very simple task.

Once a Superior Doors manufactured Kāinga Ora door is installed, it will not need to be replaced.

KĀINGA ORA STAMP OF APPROVAL

In order for Kāinga Ora to be able to monitor the correct usage of all specified Kāinga Ora doors, a special stamp was developed. Every interior door used for a Kāinga Ora home needs to carry this exact stamp on the hinged edge stile of the door. This stamp is never to be filled or removed. It should be 100% visible even after painting. Any door in Kāinga Ora homes that does not carry this stamp will be rejected by Kāinga Ora auditors.

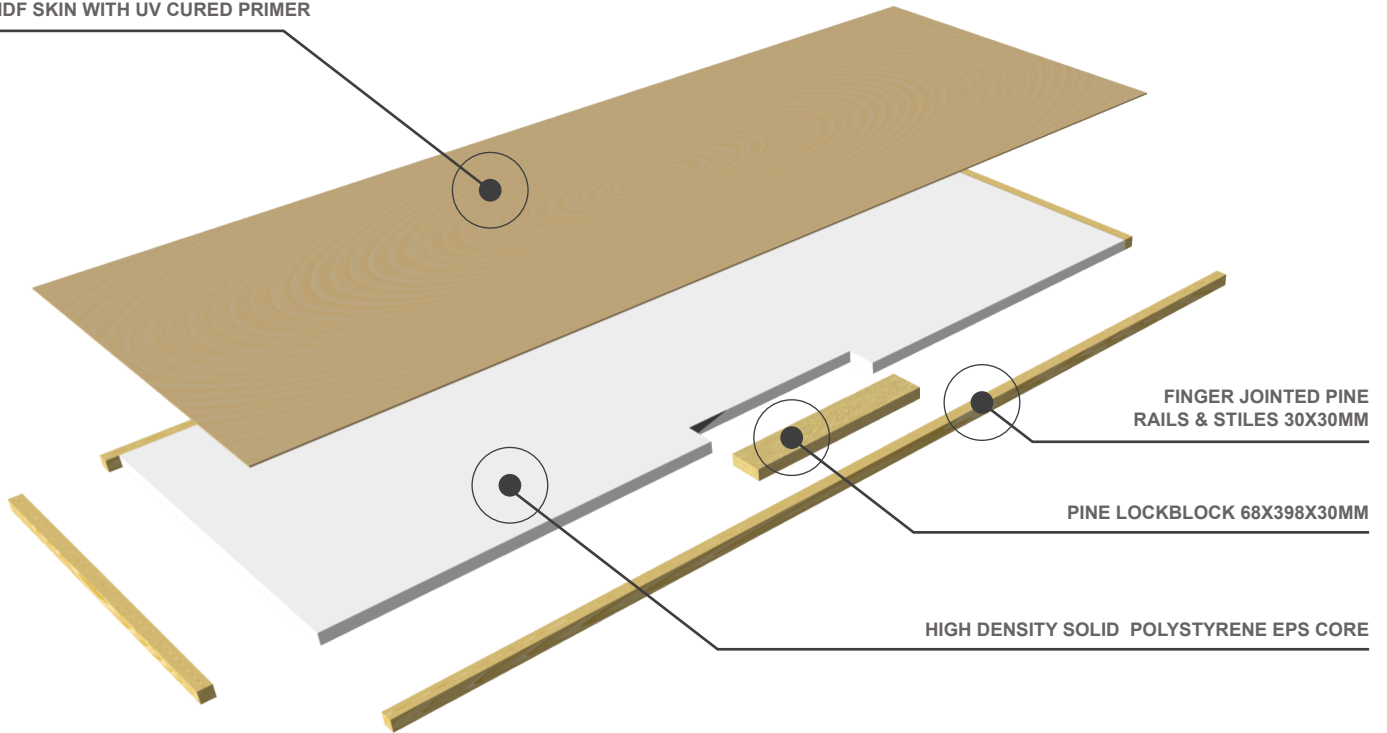

Kāinga Ora Doors manufactured by Superior Doors are 100% New Zealand Made and Branz Appraised

Available exclusively through your local PlaceMakers store for the Kāinga Ora maintenance program.
